

Trusted by over 300,000 businesses, Oracle is one of the biggest database providers in the world. There are many options when it comes to backup for this globally renowned product, with so many companies still using traditional methods. These methods are often very archaic with a high total cost of ownership (TCO).

At Assured DP we provide fast and innovative secure data management solutions for backup, recovery and archive using Rubrik's groundbreaking technology for Oracle databases.

HOW RUBRIK CHANGES THE LOOK OF TODAY'S DATA INFRASTRUCTURE

THE CHALLENGES FACED WITH TRADITIONAL ORACLE BACKUP

- As databases grow they do not fit into the backup window and Incremental Merge takes up too much storage.
- Managing and upgrading agents becomes conflicting and time consuming.
- Storage of twice daily full snapshots to achieve reasonable recovery time objective (RTO) takes up considerable space on the primary server.
- Too much time is spent managing backups.

RUBRIK BENEFITS FOR ORACLE

SIMPLE FAST CONNECTION

Simple, fast connection which natively integrates with Oracle RMAN

- No changes to existing backup windows.
- No restarts on installation.
- Automatic updates when you upgrade.

DELIVER NEAR ZERO RTOs

- Reduce recovery point objectives (RPOs) down to minutes with high-speed performance with log truncation and log management.

AUTO DISCOVER FUNCTION

- Lower operational overheads when configuring your system.
- Multiple views which are easily sortable and searchable.

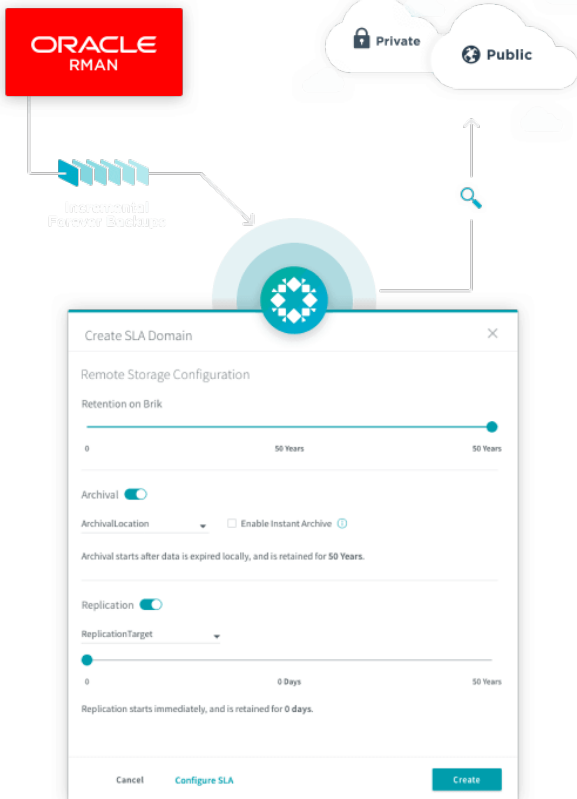

INCREMENTAL FOREVER BACKUPS

- Faster backups with lower network usage.
- Reduce storage requirements.
- Recover from any relevant point-in-time snapshot.

INSTANTLY LOCATE ALL ORACLE BACKUPS AND FILES BOTH ON PREMISES AND IN THE CLOUD

- Reduce your RTO.
- Cost effective disaster recovery.

HOW IT WORKS

1. Create managed volumes and channels per database for a simple set up with no agents required.
2. Assign SLAs to all your Oracle databases via a single policy engine.
3. Configure RMAN to mount managed volumes on host. Rubrik then provides rapid multi-stream backups. Leverage Rubrik's APIs for more granular control.
4. Rubrik will then securely orchestrate data protection, replication, and archival across data infrastructure to the cloud.
5. Wherever your backups are located, instantly find your Oracle backups and files with predictive search.
6. Recover quickly from any point-in-time snapshot, applying transaction logs to restore back to the desired point. Rubrik delivers an incremental-forever approach to generate capacity and network savings.

GDPR COMPLIANCE

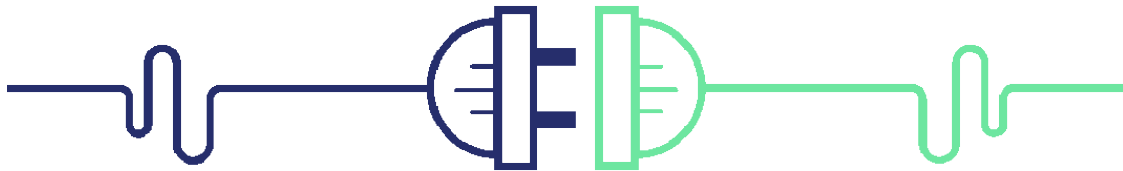

With GDPR in force, backup and disaster recovery is essential under the regulation and it doesn't only effect businesses within Europe, it effects any business in any country, who has access to European Citizen personal data.

In the event of either a physical or technical incident GDPR states that a business must be able to restore and access personal data in a timely manner. They must also regularly test, assess and evaluate data security.

Rubrik offers instant recovery where your applications and data are instantly accessible in an immutable format.

In the case of Ransomware and cyber-attacks, you can resume business within minutes of the attack helping meet GDPR compliance. Through RMAN catalogue you can recover recent backups or backups from any point-in-time using Rubrik, achieving near zero RTO and get RPO's down to minutes.

RUBRIK AND ASSURED DP

For almost 20 years backup systems have changed very little. Rubrik looked at these traditional methods to see how the process could be improved. The aim was to create something fast and simple, from this an all in one solution was created, using advanced software and cloud technology to produce a Hyper Converged Scale-Out appliance.

Rubrik encompasses backup, instant recovery, replication, search, analytics, archival, compliance, and copy data management securely in data infrastructure and the cloud. It has created a fantastic seamless integration with Oracle RMAN. The set-up is unbelievably simple, enabling you to create managed volumes and channels per database providing scalability with ease.

At Assured Data Protection, we have over 100 collective years of industry experience. We work exclusively with Rubrik so we know the product inside out and we understand its exceptional capabilities. As their leading MSP we can offer the solution as a managed service tailored to individual business needs on either a cap ex or op ex model making it affordable and achievable.
