

Identify Cyber Threats in Your Data

Ransomware and cyberattacks pose significant risks to organizations, targeting vulnerabilities to encrypt data and disrupt operations. These malicious activities can lead to substantial financial losses, reputational damage, and operational downtime, leaving businesses vulnerable and unprotected in an ever-evolving threat environment.

Assured Cyber Resiliency with Rubrik helps organizations recover from cyber threats by utilizing advanced technologies and expert monitoring. This enables businesses to strengthen their defenses by swiftly recovering critical data and keeping operations running.

With innovative technology and 24/7/365 technical support, our solution keeps organizations one step ahead of cyber adversaries. We not only aid in preventing breaches but also lay the foundation for a resilient infrastructure, empowering businesses to thrive amid growing cyber challenges.

Monitor Backups

We automatically monitor backup data for known threats to identify and alert you to security breaches in your environment.

Detect Anomalies

Our solution uses Rubrik's Machine Learning and AI to detect suspicious activity and early warning signals of attackers.

Accelerate Recovery

Recover from ransomware and other cyberattacks, on-premises or in the cloud, from your immutable backups to a last known good state.

Advanced Protection Against Ransomware

Ransomware Investigation

Discover anomalies with machine learning.

Sensitive Data Recovery

Classify data and assess exfiltration risk.

Incident Containment

Discover point of malware infection.

Orchestrated Recovery

Recover apps & data with guided workflows.

The Impact of Ransomware

70%

of attacks result in data encryption

*Semperis - 2024 Ransomware Study

59%

of organizations were hit by cyberattacks in the last year

*Sophos - The State of Ransomware 2024

35%

of victims who paid the ransom either did not receive decryption keys or received corrupted keys

*Sophos - The State of Ransomware 2024

258

days on average for security teams to identify and contain a data breach

*IMB & Ponemon Institute - Cost of a Data Breach Report 2024

We offer a flexible, consumption-based model to grow with your business, making data protection cost-effective and scalable. Our purpose-built software provides industry-leading monitoring and reporting capabilities to provide actionable insights into your data protection strategy. Our global data centers ensure data sovereignty, meeting your organization's compliance requirements. A dedicated team is always available to recover your data and minimize disruption in the event of a disaster.

Future Proof for Cloud

Our solutions allow you to move to the cloud non-disruptively with cloud-native protection.

Flexible Pricing

We offer a Capacity or Consumption model, which allows for a set price or a pay-per-use option.

Fully-Managed Service

We provide automated reporting, backup administration, and comprehensive technical support.
