

ASSURED RECOVERY WITH **Zerto**

Seamless Recovery for Business Continuity

Assured Recovery with Zerto offers a comprehensive, enterprise-grade disaster recovery solution, designed to keep your business running with minimal downtime and data loss. With Recovery Point Objectives (RPOs) as low as one minute and Recovery Time Objectives (RTOs) under five minutes, it meets the toughest demands of today's enterprises. The solution integrates seamlessly with VMware and public cloud platforms, enabling flexible, scalable hybrid and multi-cloud recovery strategies.

With Assured's managed service expertise, you access predictable, cost-effective monthly pricing that eliminates capital expenditures while accessing certified Zerto professionals for replication, failover testing, incident response, and compliance reporting. Recovery testing is simplified with non-disruptive, semi-annual failovers, ensuring DR readiness and audit compliance. Together, these capabilities reduce risk, accelerate recovery, and free organizations to focus on innovation rather than infrastructure complexity.

Minimize Downtime

1-click failover enables rapid switchovers to chosen checkpoints, keeping critical applications online during outages or cyber incidents.

Protect Data in Real Time

Continuous data protection with checkpoints every few seconds ensures near real-time resilience, enabling precise point-in-time recovery.

Simplify Disaster Recovery

Automated, orchestrated workflows reduce human error, accelerate failover/failback, and streamline compliance testing and reporting.

End-to-End Resilience

Future Proof for Cloud

Support hybrid and multi-cloud with built-in protection for smooth, disruption-free migrations.

Flexible Pricing

Simple per-VM, per-month pricing that predictably scales alongside your organization's needs.

Fully-Managed Service

24/7/365 support for monitoring, replication, failover testing, compliance reporting, and recovery.

Granular Recoveries

Restore individual files or entire VMs, minimizing time to recover and ensuring business continuity.

Comprehensive Protection and Recovery

Native VMware Integration

Native integration with VMware vSphere, leveraging Zerto Virtual Manager (ZVM) and Virtual Replication Appliances (VRAs).

Resilient Architecture

Asynchronous replication with compression and journaling enables point-in-time recovery and efficient bandwidth use.

Non-Disruptive Testing

Non-disruptive testing on isolated networks enables compliance and audit preparation and ensures ongoing confidence in disaster recovery readiness.

Two-Way Replication

Reverse protection supports two-way replication between sites, allowing failback with delta sync to minimize downtime.

Extended Journal Copy (EJC)

Long-term recovery points stored securely in cloud or on-premises repositories for regulatory, compliance, or historical needs.

APIs & Automation

RESTful API and PowerShell cmdlets enable the ability to automate recovery workflows and integration with orchestration tools.

We offer a flexible, consumption-based model to grow with your business, making data protection cost-effective and scalable. Our purpose-built software provides industry-leading monitoring and reporting capabilities to provide actionable insights into your data protection strategy. Our global data centers ensure data sovereignty, meeting your organization's compliance requirements. A dedicated team is always available to recover your data and minimize disruption in the event of a disaster.

Future Proof for Cloud

Our solutions allow you to move to the cloud non-disruptively with cloud-native protection.

Flexible Pricing

We offer a Capacity or Consumption model, which allows for a set price or a pay-per-use option.

Fully-Managed Service

We provide automated reporting, backup administration, and comprehensive technical support.
