

Ensure Resiliency Against Cyber Threats

Public sector organizations operate in one of the most demanding threat landscapes. From relentless cyberattacks to natural disasters and system outages, the risks are constant—and the consequences of disruption are profound. To safeguard sensitive data, maintain compliance with strict federal and state mandates, and ensure uninterrupted citizen services, agencies need a partner they can trust.

That's where Assured Data Protection comes in. We deliver a comprehensive suite of fully managed solutions purpose-built for the public sector. Powered by Rubrik's Zero Trust cyber recovery platform, our services provide secure, compliant, and resilient backup, disaster recovery, and cyber resiliency. Every solution is mapped to stringent regulatory requirements—including CJIS, CMMC Level 1, SOC 2, and ISO 27001—so agencies can operate with confidence while recovering quickly from any disruption.

Backed by U.S.-based 24/7/365 expert support and a proven record of protecting mission-critical environments, Assured ensures your data—and your mission—remain safe, compliant, and always available.

Protect your Data

Our managed services protect and secure your backup data in an immutable format, whether on site, off site, or in the cloud.

Detect Anomalies

Utilizing Machine Learning and AI, we identify anomalies, significant data changes, or suspicious activity within your backup environment.

Recover Operations

Recover from ransomware and other cyberattacks, on-premises or in the cloud, from your immutable backups with near-zero RPOs & RTOs.

Comprehensive Managed Data Protection

Managed Backup

Backup, archive, and recover data on-premises or in your cloud environment.

Off-Site Replication

Replicate critical data to a secure, off-site location to keep operations running.

Disaster Recovery

Recover all your critical IT systems in minutes and hours, not days or weeks.

Cyber Resiliency

Monitor business critical data to prevent data loss and cyberattacks.

Our Solutions

Managed Backup

Our Backup as a Service delivers enterprise-grade backup, recovery, and archiving—purpose-built to protect public sector organizations of any size across single or multiple locations in private, public, and hybrid cloud environments. Delivered as a fully managed service, it includes all hardware, software, and 24/7/365 U.S.-based support, tailored to meet your operational and compliance requirements.

Disaster Recovery

Disaster Recovery as a Service ensures near-zero recovery times in the event of a significant IT failure. Leverage Assured's DR platform and remove the need for a secondary data center. Assured's RecoverView platform enables orchestration and automation of recovery testing and live invocation. This includes a fully-documented audit and compliance report.

Off-Site Replication

Replication as a Service provides an up-to-date copy of your backup data in a secure, air-gapped U.S.-based facility or at an alternative location of your choice. In the event of production data loss, this enables fast recovery from any point in time to your chosen site. For agencies requiring cloud deployments, our solutions can also be delivered in GovCloud environments, including Azure Gov, AWS GovCloud, and GCC High.

Cyber Resiliency

Cyber Resiliency as a Service continuously monitors backup data to detect suspicious activity, ransomware, and other cyber threats. It identifies early warning signals of attackers and accelerates recovery to the last known good state—while supporting audit and regulatory compliance requirements. Automated reporting provides ongoing visibility and audit-ready documentation.

We deliver a flexible, consumption-based model that scales with your needs, making data protection cost-effective and sustainable. Our platform provides advanced monitoring and reporting to give agencies actionable insights that strengthen data protection strategies. With U.S.-based data centers and GovCloud deployment options, we ensure data sovereignty and support strict compliance requirements. Backed by 24/7/365 U.S.-based expert support, our team is always ready to recover your data and minimize disruption when it matters most.

Future Proof for Cloud

Our solutions allow you to move to the cloud non-disruptively with cloud-native protection.

Flexible Pricing

We offer a Capacity or Consumption model, which allows for a set price or a pay-per-use option.

Fully-Managed Service

We provide automated reporting, backup administration, and comprehensive technical support.
