

Protect Production Data and Operational Continuity

The manufacturing industry remains a prime target for cyberattacks aimed at causing operational disruption, reputational damage, and data loss. As these threats continue to rise, it is essential for manufacturing organizations to have a dependable backup and disaster recovery solution in place. This need is even more critical for manufacturers with complex operational environments, where production lines span multiple plants, warehouses, remote facilities, and smaller satellite locations. Varying levels of connectivity and limited or no on-site IT support at these locations can make consistent, reliable data protection a significant challenge.

At Assured Data Protection, we help manufacturing organizations secure critical systems across all site locations, maintain regulatory compliance, and recover quickly from cyberattacks or disasters, without adding operational strain to internal teams.

The Pain Points Assured Solves

Ransomware Threats

Ransomware can halt production and compromise critical data. Our immutable backups ensure fast, clean recovery while reducing downtime and financial impact.

Distributed Sites

Small or remote facilities often lack dedicated, on-site IT staff. We provide centralized monitoring, management, and recovery across all site locations.

Compliance Demands

Increasing regulatory oversight requires sensitive data discovery, audit trails, and standardized governance. We automate all of this to reduce overhead.

The Assured Solution

Immutable Secure Backups

Encrypted, air-gapped backups to ensure operational continuity.

Built-In Anomaly Detection

Detect anomalies, data changes, or suspicious behavior in backup environments.

Managed Backup and Recovery

DR experts on call 24/7/365 to recover critical data from attacks.

Flexible Pricing and Delivery

OpEx-friendly pricing with on-premises, cloud, and hybrid options.

Protect Production Operations with Assured

Compliance and Governance

Identify and protect sensitive operational and regulatory data with automated reporting and central visibility into where data is stored.

Protect Data from Ransomware Threats

Encrypted, immutable backups safeguard critical data against encryption, deletion, and improper alteration.

Simplify Audits with Automated Reporting

Demonstrate compliance during audits with built-in documentation and biannual DR testing.

Reduce Burden on Internal IT Teams

Our fully-managed services reduce burden on internal IT teams, with no additional headcount or infrastructure required.

Flexible Pricing to Fit Your Budget

We offer flexible pricing options, including CapEx and consumption models, to meet your organization's needs.

Access 24/7/365 Support

Utilize support and guidance from disaster recovery experts to protect, detect, and recover critical data and operations quickly.

Why Manufacturing Organizations Choose Assured

We've partnered with numerous manufacturing organizations to strengthen their cyber resilience, ensure compliance, and simplify backup and recovery operations. Here's what one of our customers had to say:

"Assured transformed our disaster recovery strategy, making it both cost-effective and reliable... We sleep better knowing that our DR capabilities are robust and can bring us back online within hours, not weeks."

Chemicals Manufacturer

Explore our range of case studies [here](#), and [get in touch](#) to see how our solutions can help your organization.

We offer a flexible, consumption-based model to grow with your business, making data protection cost-effective and scalable. Our purpose-built software provides industry-leading monitoring and reporting capabilities to provide actionable insights into your data protection strategy. Our global data centers ensure data sovereignty, meeting your organization's compliance requirements. A dedicated team is always available to recover your data and minimize disruption in the event of a disaster.

Future Proof for Cloud

Our solutions allow you to move to the cloud non-disruptively with cloud-native protection.

Flexible Pricing

We offer a Capacity or Consumption model, which allows for a set price or a pay-per-use option.

Fully-Managed Service

We provide automated reporting, backup administration, and comprehensive technical support.
