

Ensure Operational Resiliency

As the cyber threat landscape evolves, non-profit organizations are increasingly attractive targets. Limited budgets and lean IT resources often result in weaker defenses, creating greater exposure to attacks. Non-profits also hold sensitive donor, volunteer, and beneficiary data that is highly valuable to cybercriminals. A single attack can halt operations, delay services, and jeopardize funding. Reputational damage from a breach can drive away donors and supporters, reducing the resources available to sustain the organization's mission. Beyond financial loss, communities relying on these programs may face direct harm if services are disrupted.

At Assured Data Protection, we help you safeguard critical data and recover quickly from disasters or cyberattacks. Acting as an extension of your IT department, our experts provide 24/7/365 support to strengthen defenses, minimize downtime, and ensure operational resilience.

The Pain Points Assured Solves

Ransomware Threats

Ransomware cripples systems, exposes data, and damages reputation. Our solutions mitigate these threats, protecting data and lowering recovery costs.

Internal IT Resources

We act as an extension of your IT team, ready to take over data recovery in the event of a disaster or cyberattack, relieving the burden on internal IT resources.

Out of Date Infrastructure

Outdated infrastructure increases cyber risks. Our solutions help you migrate to secure, reliable infrastructure - whether on-premises or in the cloud.

The Assured Solution

Immutable Secure Backups

Encrypted, air-gapped backups to ensure business continuity.

Built-In Anomaly Detection

Detect anomalies, data changes, or suspicious behavior in backup environments.

Managed Backup and Recovery

DR experts on call 24/7/365 to recover critical data from attacks.

Flexible Pricing and Delivery

OpEx-friendly pricing with on-premises, cloud, and hybrid options.

Protect Vital Data with Assured

Keep Operations Running

Our disaster recovery solution keeps operations running through a secondary site, preventing disruption and reputational harm.

Protect Data from Ransomware Threats

Encrypted, immutable backups safeguard data against encryption, deletion, and improper alteration.

Simplify Audits with Automated Reporting

Easily demonstrate compliance during audits with built-in documentation and biannual DR testing.

Reduce Burden on Internal IT Teams

Our fully-managed services reduce the burden on internal teams, with no additional headcount or infrastructure required.

Flexible Pricing to Fit Your Budget

We offer flexible pricing options, including CapEx and consumption models, to meet your organization's needs.

Access 24/7/365 Support

With global reach, our DR experts provide proactive support to quickly protect and recover critical data and operations.

Why Non-Profit Organizations Choose Assured

We've partnered with numerous non-profit organizations to strengthen their cyber resilience, ensure compliance, and simplify backup and recovery operations.

"From implementation through to the day-to-day running with Assured, it has been seamless. The solution works and the team has been really proactive and responsive. We couldn't be happier with the service."

Propel Nonprofits

Explore our full range of case studies [here](#), and [get in touch](#) to see how we can help your organization.

We offer a flexible, consumption-based model to grow with your business, making data protection cost-effective and scalable. Our purpose-built software provides industry-leading monitoring and reporting capabilities to provide actionable insights into your data protection strategy. Our global data centers ensure data sovereignty, meeting your organization's compliance requirements. A dedicated team is always available to recover your data and minimize disruption in the event of a disaster.

Future Proof for Cloud

Our solutions allow you to move to the cloud non-disruptively with cloud-native protection.

Flexible Pricing

We offer a Capacity or Consumption model, which allows for a set price or a pay-per-use option.

Fully-Managed Service

We provide automated reporting, backup administration, and comprehensive technical support.
